

A revolutionary and fully scalable Big Data Security Analytics Platform that gathers valuable data from multiple technology sources and empowers users to take actionable, critical decisions in real-time.

## Keeping your Company Safe and Strong

## Business Value

- Reduced investigation time by 10 times
- Decision making support
- Very quick time to value (standard initial deployment in less than a day)
- Leveraging your existing security investment
- Compliance to must-have regulations and standards (including GDPR)

“We get light speed answers on complex investigations: from 1 day with legacy systems to **5 minutes with CyberQuest.**” - CERT-RO

“The solution helped us to reduce our decision making time **from hours to minutes.**” - Vodafone

“We had many disparate security and SIEM solutions and technologies that are now finally unified and transparent.” - Government Organization
