CyberQuest for Vienna Insurance Group, Poland:
Advanced Data Correlation and Unification for over 35 System Types

VIG
VIENNA INSURANCE GROUP

VIG'S CASE AT A GLANCE:

◌ Data resides in many disparate systems

◌ No visibility over operational and security data

Overview

Vienna Insurance Group is one of the leading insurance groups in Austria and Central and Eastern Europe (CEE).

Innovation, strong customer relationships and an emphasis on customer service create a high quality product portfolio offering attractive solutions in both the life and non-life insurance segments.

Vienna Insurance Group's core markets include Austria, the Czech Republic, Slovakia, Poland, Romania, Bulgaria, Croatia, Hungary, Serbia and Ukraine. There is one thing, however, that all Vienna Insurance Group companies have in common: the goal of providing security to customers.

SUMMARY BENEFITS:

◌ Quick time to value & fast ROI

◌ Time savings and resources optimization: light speed answers on events and investigations

◌ Decision making support due to industry specific dashboards

◌ Unlimited built-in horizontal scalability

Customer Challenges & Requirements

Vienna Insurance Group was looking for a solution that would unify the data from various systems and offer one single source of visibility, correlation and reporting. They needed full transparency and visibility into security data and events, in order to prevent incidents and react in real-time based on documented and integrated data.

The Solution

CyberQuest is a revolutionary Big Data Security Analytics Platform and new generation SIEM that gathers valuable data from multiple technology sources and empowers users to take actionable, critical decisions in real-time.

VIG

VIENNA INSURANCE GROUP

Solution Capabilities

- Data correlation and unification from over 35 system types: business applications, web servers, operating system logs, databases, virtualization software, network, firewalls, operational reports

- Advanced event search & filter: correlation between billions of events in seconds

- Advanced event browser: data mapping based on user defined criteria

- User defined real-time alerts for the most specific event requirements, in order to enable immediate measures

- Context sensitive dashboards for rapid decision making among infinite data logs

- Predefined scheduled reports to ensure compliance (ISO 27001, COBIT, FISMA, HIPPA, PCI/DSS, SOX) and optimize the internal team's effort

- Intuitive users interface with advanced options for search, filter and data visualization

Business Value & Results

ABOUT NEXTGEN SOFTWARE

Nextgen Software is an agile European technology company that delivers innovative cybersecurity software solutions based on more than 15 years of worldwide experience in successful implementations with both government and enterprise sectors.

Our solutions ensure full visibility, compliance to international standards and regulations, and powerful analytics that keep your company safe and strong.

Rapid analysis among all security data in a matter of seconds instead of hours

Smart detailed analysis for each security incident

Data cross-correlation between the infrastructure and operational applications

Integrating all existing security and business applications

Enhanced decision making capability and decision making support with contextual dashboards

High self-manageability and autonomy
